Colina Insurance Limited

Audited Consolidated Financial Statements Year Ended December 31, 2018 With Report of Independent Auditors

KPMG PO Box N-123 Montague Sterling Centre East Bay Street Nassau, Bahamas Telephone +1 242 393 2007 Fax +1 242 393 1772 kpmg.com.bs

INDEPENDENT AUDITORS' REPORT

To the Shareholder of Colina Insurance Limited

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the consolidated financial statements of Colina Insurance Limited and its subsidiaries ("the Group"), which comprise the consolidated statement of financial position as at December 31, 2018, the consolidated statements of comprehensive income, changes in equity and cash flows for the year then ended, and notes, including significant accounting policies and other explanatory information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2018, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRSs").

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with International Ethics Standards Board for Accountants Code of Ethics for Professional Accountants ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due
 to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence
 that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
 misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion,
 forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements (continued)

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including
 the disclosures, and whether the consolidated financial statements represent the underlying transactions and
 events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Nassau, Bahamas April 15, 2019

Jacques Tremblay FCIA, MAAA, FSAPartner

April 12, 2019

Subject: 2018 Certification of actuarial liabilities

I have valued the actuarial liabilities of Colina Insurance Limited for its consolidated balance sheet as of December 31, 2018, for a total amount of \$434,961,581 and their change in the consolidated statement of operations for the year then ended in accordance with accepted actuarial practice, the Canadian Institute of Actuaries' Standards of Practice (for Life companies), and the Canadian valuation method ("CALM"), including selection of appropriate assumptions and methods.

In my opinion, the amount of the actuarial liabilities makes appropriate provision for all future policyholder obligations, and the consolidated financial statements of Colina Insurance Limited present fairly the results of the valuation.

Respectfully submitted,

Jacques Tremblay FCIA, MAAA, FSA

Appointed Actuary for Colina Insurance Limited, Fellow of Canadian Institute of Actuaries, Member of the American Academy of Actuaries, Fellow of Society of Actuaries

(Concluded)

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

1. Corporate Information

Colina Insurance Limited ("the Company") was incorporated under the laws of the Commonwealth of The Bahamas on July 6, 1993.

The principal activity of the Company is the transaction of life and health insurance business. The Company is registered to operate as a life and health insurer in The Bahamas, The Cayman Islands, and The Turks and Caicos Islands.

The Company is wholly owned by Colina Holdings Bahamas Limited ("the Parent" or "CHBL") whose majority shareholder is AF Holdings Ltd. ("AFH"). Both the Parent and AFH are Bahamian companies and the ordinary shares of the Parent are listed on the Bahamas International Securities Exchange. All significant balances and transactions with AFH and parties related to AFH are disclosed as related party transactions in these consolidated financial statements (See Note 34).

The registered office of the Company is located at Trinity Place Annex, Frederick and Shirley Streets, P.O. Box N-4805, Nassau, The Bahamas and its principal place of business is located at 308 East Bay Street, P.O. Box N-4728, Nassau, The Bahamas.

The consolidated financial statements of the Company for the year ended December 31, 2018 were authorized for issue in accordance with a resolution of the Company's Board of Directors on April 12, 2019.

2. Changes in Accounting Policies and Disclosures

The accounting policies adopted are consistent with those of the previous financial year except for the following new and amended International Financial Reporting Standards ("IFRS") and International Financial Reporting Interpretations Committee ("IFRIC") interpretations. The Company has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective. The following accounting policies were applicable to the Company and were adopted in the year commencing January 1, 2018:

- IFRS 15 Revenue from Contracts with Customers
- Amendments to IFRS 2 Classification and Measurement of Share-based Payment Transactions
- Amendments to IAS 40 Transfers of Investment Property
- Amendments to IFRS 1 and IAS28 Annual Improvements to IFRSs 2014-2016 Cycle
- IFRIC 22 Foreign Currency Transactions and Advance Consideration
- IFRIC23 Uncertainty over Income Tax Treatments

The adoption of the above accounting policies has not had any material impact on the amounts reported for current and prior years but may affect the accounting for future transactions and arrangements.

3. Standards Issued but not yet Effective

The standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Company's financial statements are disclosed below. The Company intends to adopt these standards, if applicable, when they become effective.

- Amendments to IAS 28 Long-term Interests in Associates and Joint Ventures
- Amendments to IAS 19 Plan Amendment, Curtailment or Settlement
- Annual Improvements to IFRS Standards 2015-2017 Cycle
- Amendments to References to Conceptual Framework in IFRS Standards
- Amendments to IFRS 3 Definition of a Business
- Amendments to IAS 1 and IAS 8 Definition of Material
- IFRS 17 Insurance Contracts
- Amendments to IFRS 10 and IAS 28 Sale or Contribution of Assets between an Investor and its Associate or Joint Venture
- IFRS 14 Regulatory Deferral Accounts

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

- IFRS 9 Financial Instruments
- Amendments to IFRS 9 Prepayment Features with Negative Compensation
- IFRS 16 Leases

The IASB has issued a temporary exemption for the effective date of implementation of IFRS 9 for insurance companies which meet certain qualifying criteria. This exemption allows the application of IFRS 9 to be deferred until the adoption of IFRS 17 – Insurance Contracts, which is effective for periods commencing on or after January 1, 2022. At December 31, 2018, the Company meets these qualifying criteria and has therefore deferred implementation of IFRS 9.

Management has not yet assessed the full impact of the relevant adoption of these standards and interpretations in future periods against the consolidated financial statements of the Company.

4. Summary of Significant Accounting Policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to the years presented, unless otherwise stated.

4.1 Statement of compliance

The consolidated financial statements of the Group have been prepared in accordance with IFRS as issued by the International Accounting Standards Board ("IASB").

The Company presents its consolidated statement of financial position broadly in order of liquidity. An analysis regarding recovery or settlement within twelve months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 35.

4.2 Basis of preparation

The consolidated financial statements of the Company have been prepared under the historical cost convention, as modified by the revaluation of certain financial assets and liabilities and investment properties that are required to be remeasured at fair value. The Company, with the concurrence of The Insurance Commission of The Bahamas, uses actuarial practices generally accepted in Canada for the valuation of its provision for future policyholder benefits as no specific guidance is provided by IFRS for determining such provisions. The adoption of IFRS 4 – Insurance Contracts, permits the Company to continue with this valuation policy.

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position only when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liability simultaneously. Income and expense will not be offset in the consolidated statement of profit or loss unless required or permitted by any accounting standard or interpretation, as specifically disclosed in the accounting policies of the Company.

4.3 Significant accounting judgments and key sources of estimation uncertainty

The preparation of the consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities, and the accompanying disclosures and the disclosures of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting period. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in the future.

(a) Valuation of long term insurance contract liabilities and investment contract liabilities with a Discretionary Participation Feature ("DPF")

The liability for life insurance contracts and investment contracts with DPF is either based on current assumptions or on assumptions established at inception of the contract, reflecting the best estimate at the time increased with a margin for risk and adverse deviation. All contracts are subject to a liability adequacy test, which reflect management's best current estimate of future cash flows.

The main assumptions used relate to mortality, morbidity, longevity, investment returns, expenses, lapse and surrender rates, and discount rates. The Company bases mortality and morbidity rates on standard industry Canadian mortality tables which reflect historical experiences, adjusted when

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

appropriate to reflect the Company's unique risk exposure, product characteristics, target markets and own claims severity and frequency experiences. For those contracts that insure risk related to longevity, prudent allowance is made for expected future mortality improvements as well as wide ranging changes to life style, could result in significant changes to the expected future mortality exposure.

Estimates are also made as to future investment income arising from the assets backing life insurance contracts. These estimates are based on current market returns as well as expectations about future economic and financial developments.

Assumptions on future expense are based on current expense levels, adjusted for expected expense inflation if appropriate.

Lapse and surrender rates are based on the Company's historical experience of lapses and surrenders.

Discount rates are based on current industry risk rates, adjusted for the Company's own risk exposure.

The carrying value at December 31, 2018 of long term insurance contract liabilities with DPF is \$219,632,020 (2017: \$218,535,609) and of investment contract liabilities with DPF is \$6,345,023 (2017: \$7,562,665) (See Note 18).

(b) Accident and health insurance contract liabilities

For medical insurance contracts, estimates have to be made for the expected ultimate cost of claims reported at the consolidated statement of financial position date and for the expected ultimate cost of claims incurred but not yet reported ("IBNR") at the reporting date. It can take a significant period of time before the ultimate claims cost can be established with certainty and for certain types of policies, IBNR claims form the majority of the consolidated statement of financial position liability for accident and health insurance.

The ultimate cost of outstanding claims is estimated by using a range of standard actuarial claims projection techniques.

The main assumption underlying these techniques is that a company's past claims development experience can be used to project future claims development and hence, ultimate claims costs.

The carrying value at the reporting date of accident & health insurance contract liabilities is \$15,300,568 (2017: \$15,311,724) (See Note 18).

(c) Goodwill impairment testing

Goodwill is tested for impairment annually and when circumstances indicate that the carrying value may be impaired. Impairment is determined for goodwill by assessing the recoverable amount of the cash-generating units to which the goodwill relates. Where the recoverable amount of the cash-generating units is less than their carrying amount, an impairment loss is recognized. Impairment losses relating to goodwill cannot be reversed in future periods.

The carrying value of goodwill is \$7,797,613 (2017: \$7,797,613) (See Note 17).

(d) Revaluation of property and equipment and investment properties

The Company carries its investment properties at fair value, with changes in fair value being recognized in the consolidated statement of profit or loss. In addition, it measures land and buildings at revalued amounts with changes in fair value being recognized in the revaluation reserve. The Company assesses its property holdings through the use of independent valuation specialists on a periodic basis, performing management assessments in the intervening years. For investment properties, a valuation methodology based on a discounted cash flow ("DCF") model was used, as there is a lack of comparable market data due to the nature of the properties. Land and buildings were valued by reference to market-based evidence, using comparable prices adjusted for specific market factors such as nature, location, and the condition of the respective property. Key assumptions used to determine the fair value of the properties and sensitivity analysis are discussed in Note 14.

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

4.4 Principles of consolidation

The consolidated financial statements include the accounts of the Company and subsidiaries. Control is achieved when the Company is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Company controls an investee if and only if the Company has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure, or rights, to variable returns from its involvement with the investee; and
- The ability to use its power over the investee to affect its returns.

When the Company has less than a majority of the voting or similar rights of an investee, the Company considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangements with the other vote holders of equity in the investee;
- Rights arising from other contractual arrangements; and
- The Company's voting rights and potential voting rights.

Where the Company has control, subsidiaries are fully consolidated from the date on which control is transferred to the Company and are de-consolidated from the date on which control ceases. The financial statements of subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies.

Non-controlling interests in the net assets of consolidated subsidiaries are identified separately from the Company's equity. Non-controlling interests are measured at their proportionate share of the acquiree's identifiable net assets at the date of acquisition. Non-controlling interests consist of the amount of those interests at the date of the original business combination (See Note 4.5) and the non-controlling interest's share of changes in equity since the date of the combination.

All material inter-company balances and transactions are eliminated on consolidation. The accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Company.

4.5 Business combinations

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value and the amount of any non-controlling interest in the acquiree. For each business combination, the Company has an option to measure any non-controlling interests in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's identifiable net assets. Acquisition related costs are expensed as incurred and included in administrative expenses.

When the Company acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions at the acquisition date. This includes separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, any previously held equity interest in the acquiree is remeasured to fair value as at the acquisition date and any resulting gain or loss is recognized through profit or loss. It is then considered in the determination of goodwill.

Any contingent consideration to be transferred by the acquirer will be recognized at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration which is deemed to be an asset or a liability will be recognized as measurement period adjustments in accordance with the applicable IFRS. If the contingent consideration is classified as equity, it will not be remeasured and its subsequent settlement will be accounted for within equity.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling interests, and any previous interest held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Company re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognized at the acquisition date. If the re-assessment still results in an excess of the

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

fair value of the net assets acquired over the aggregate consideration transferred, then the gain is recognized in profit or loss. After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purposes of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to an appropriate cash-generating unit that is expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained.

4.6 Equity-accounted investees

The Company's equity-accounted investees are accounted for using the equity method of accounting. An associate is an entity over which the Company has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies. The considerations made in determining significant influence are similar to those necessary to determine control over subsidiaries.

Under the equity method, investments in associates are carried in the consolidated statement of financial position at cost plus post-acquisition changes in the Company's share of the net assets of the associate. Any excess of the cost of acquisition over the Company's share of the net fair value of the identifiable assets, liabilities and contingent liabilities of the associate recognized at the date of acquisition is recognized as goodwill. As goodwill relating to an associate forms part of the carrying amount of an equity-accounted investee and is not separately recognized, it is neither amortized nor individually tested for impairment.

After application of the equity method, the Company assesses at each reporting date whether there is any objective evidence that the entire carrying amount of the equity-accounted investee is impaired by comparing its carrying value to its recoverable amount. Any impairment losses are recognized immediately in the consolidated statement of profit or loss.

The consolidated statement of profit or loss reflects the share of the results of operations of the associate. Where there has been a change recognized directly in the equity of the associate, the Company recognizes its share of any changes and discloses this, when applicable, in the statement of changes in equity. Profits or losses resulting from transactions between the Company and the associate are eliminated to the extent of the Company's interest in the relevant associate.

Upon loss of significant influence over an associate, the Company measures and recognizes any remaining investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the remaining investment and proceeds from disposal is recognized in profit or loss.

4.7 Foreign currency translation

The Company's functional and presentation currency is the Bahamian dollar. Monetary assets and liabilities denominated in currencies other than the Bahamian dollar are translated to Bahamian dollars using the rate of exchange prevailing at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Income and expense items denominated in foreign currencies are translated at a rate of exchange that approximates the actual rate prevailing at the time of the transaction. Resulting differences are recognized in income in the reporting period in which they arise.

4.8 Cash and cash equivalents

For the purposes of the consolidated statement of cash flows, cash and cash equivalents comprise: cash on hand; demand deposits; term deposits with original maturities of 90 days or less; net of bank overdrafts.

4.9 Financial assets

Classification

The Company classifies its financial assets into the following categories: financial assets at fair value through profit or loss, loans and receivables, and available-for-sale financial assets. The classification

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition and re-evaluates the classification at every reporting date.

Financial assets at fair value through profit or loss ("FVPL")

Financial assets at FVPL has two sub categories - namely, financial assets held for trading, and those designated at fair value through the consolidated statement of profit or loss at inception. Investments typically bought with the intention to sell in the near future are classified as held for trading. For investments designated at initial recognition as at FVPL, the following criteria must be met:

- The designation eliminates or significantly reduces the inconsistent treatment that would otherwise
 arise from measuring the assets and liabilities or recognizing gains and losses on a different basis;
 or
- The assets are part of a group of financial assets which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management or investment strategy.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market other than those that the Company intends to sell in the short term or that it has designated as at FVPL or available-for-sale. Balances that are included in this classification include: mortgages and commercial loans, policy loans, receivables arising from insurance contracts, and term deposits with maturities of greater than 90 days.

Available-for-sale ("AFS") financial assets

AFS financial assets are non-derivative financial assets that are either designated in this category or not classified in any of the other categories.

Recognition

Regular way purchases and sales of financial assets are recognized on trade date – the date on which the Company commits to purchase or sell the asset. Investments are initially recognized at fair value plus, in the case of all financial assets not carried at FVPL, transaction costs that are directly attributable to their acquisition.

Derecognition

Investments are derecognized when the rights to receive cash flows from the investments have expired or where they have been transferred and the Company has also transferred substantially all risks and rewards of ownership.

Measurement

AFS financial assets and financial assets at FVPL are carried at fair value. Realized and unrealized gains and losses arising from changes in the fair value of the financial assets classified in the FVPL category are included in the consolidated statement of profit or loss in the period in which they arise. Unrealized gains and losses arising from changes in the fair value of financial assets classified as AFS are recognized in the revaluation reserve in the consolidated statement of changes in equity. When financial assets classified as AFS are sold or impaired, the difference between cost or amortized cost and estimated fair value is removed from the revaluation reserve and charged to the consolidated statement of profit or loss.

4.10 Fair value measurement

The Company measures financial instruments and non-financial assets such as investment properties and certain items of property and equipment at fair value at each balance sheet date. Fair value is defined under accounting guidance currently applicable to the Company to be the prices that would be received upon the sale of an asset or paid to transfer a liability in an orderly transaction between open market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or;
- In the absence of a principal market, in the most advantageous and accessible market for the asset or liability.

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by reassessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

There have been no material changes in the Company's valuation techniques in the period represented in these consolidated financial statements.

4.11 Impairment of financial assets

Financial assets carried at amortized cost

The Company assesses at each reporting date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that have occurred after the initial recognition of the asset ('a loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. Objective evidence that a financial asset or group of assets is impaired includes observable data that comes to the attention of the Company about the following events:

- significant financial difficulty of the issuer or debtor;
- a breach of contract, such as a default or delinquency in payments;
- it becoming probable that the issuer or debtor will enter bankruptcy or other financial reorganization;
- the restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;
- the disappearance of an active market for that financial asset because of financial difficulties;
 or
- observable data indicating that there is a measurable decrease in the estimated future cash
 flows from a group of financial assets since the initial recognition of those assets, though the
 decrease cannot yet be identified with the individual financial assets in the group, including:
 - adverse changes in the payment status of issuers or debtors in the group; or
 - local economic conditions that correlate with defaults on the assets in the group.

If there is objective evidence that an impairment loss has been incurred on loans and receivables carried at amortized cost, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The calculation of the present value of the estimated future cash flows of a collateralized financial asset reflects the cash flows

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account. If a write-off is later recovered, the recovery is credited to finance costs in the statement of profit or loss.

Financial assets carried at fair value

The Company assesses at each reporting date whether there is objective evidence that an AFS financial asset is impaired, including in the case of equity investments classified as AFS, a significant or prolonged decline in the fair value of the security below its cost. If any evidence exists for AFS financial assets, the cumulative loss – measured as the difference between the acquisition cost and current fair value, less any impairment loss on the financial asset previously recognized in profit or loss – is removed from equity and recognized in the consolidated statement of profit or loss. The impairment loss is reversed through the consolidated statement of profit or loss if in a subsequent period the fair value of a debt instrument classified as AFS increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss.

For unlisted shares classified as AFS, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

4.12 Investment properties

Investment properties comprise freehold land and buildings, residential rental properties, and commercial properties that are held for long-term yields and capital appreciation. Investment properties are initially measured at cost, including transaction costs. The carrying amount includes the cost of replacing part of an existing investment property at the time that cost is incurred if the recognition criteria are met; and exclude the costs of day-to-day servicing of an investment property.

Subsequent to initial recognition, such properties are measured at estimated fair value based on open market value determined periodically by external appraisers with management valuations in intervening periods. Gains or losses arising from changes in the fair values of investment properties are included in the consolidated statement of profit or loss in the year in which they arise.

Investment properties are derecognized either when they have been disposed of, or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognized in the consolidated statement of profit or loss in the year of retirement or disposal.

Transfers are made to or from investment property only when there is a change in use evidenced by the end of owner-occupation, commencement of an operating lease to another party, or completion of construction or development. For a transfer from investment property to owner occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner-occupied property becomes an investment property, the Company accounts for such property in accordance with the policy stated under property and equipment up to the date of the change in use.

When the Company completes the construction or development of a self-constructed investment property, any difference between the fair value of the property at that date and its previous carrying amount is recognized in the consolidated statement of profit or loss.

4.13 Property and equipment

Property and equipment, with the exception of certain Land improvements and Buildings, are carried at cost less accumulated depreciation and any accumulated impairment losses. Land improvements and buildings are carried at their revalued amounts, as assessed by qualified independent property appraisers or management valuation in intervening periods. Depreciation is charged using the straight-line method to allocate the cost of the assets over their estimated useful lives, as follows:

• Furniture, fixtures and equipment 5 to 10 years

Computer hardware
 3 to 5 years

Motor vehicles
 4 to 5 years

Leasehold improvements
 5 to 15 years, or shorter lease term

Land improvements and buildings 40 to 50 years

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

Land is not depreciated. The assets' useful lives are reviewed at each reporting date and adjusted if appropriate. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amounts. These are included in the consolidated statement of profit or loss.

Increases in the carrying amount arising on revaluation of land and buildings are credited to the revaluation reserve in equity.

Decreases that offset previous increases of the same asset are charged against the revaluation reserve directly in equity; all other decreases are charged to the consolidated statement of profit or loss and depreciation based on the asset's original cost is transferred from the revaluation reserve to retained earnings.

4.14 Goodwill and other intangible assets

Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the Company's share of the net identifiable assets of the acquiree at the acquisition date. Goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. Impairment losses related to goodwill cannot be reversed in future periods. Goodwill is allocated to Cash Generating Units ("CGUs") for the purpose of impairment testing. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

For goodwill arising from the purchase of insurance related business, goodwill is allocated to CGUs identified according to the nature and type of insurance contract by major block of business.

For each CGU, the impairment charge is calculated by comparing the present value of the in force and projected new business at time of purchase and currently to determine how much the value has decreased relative to the original amount of goodwill recorded.

The Company's policy for goodwill arising on the acquisition of an associate is described in Note 4.6.

Other intangible assets

Other intangible assets include acquired computer software licenses which are capitalized on the basis of the costs incurred to acquire and implement the specific software. These costs are amortized using the straight-line method over the estimated useful life, not exceeding a period of three years and are included in general and administrative expenses in the consolidated statement of profit or loss. At each reporting date, the Company reviews the carrying amounts of its intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss.

Other intangible assets included in equity-accounted investees

These intangible assets include customer relationships, non-competitive agreement, trade name, and software and are carried at cost less accumulated amortization. Intangible assets included in equity-accounted investees are amortized on a straight-line basis as follows:

Customer relationships10 yearsNon-competitive agreement2 yearsTrade name5 to 9 yearsSoftware3 years

The carrying amount of intangible assets included in equity-accounted investees is reviewed at each reporting date to assess whether it is recorded in excess of its recoverable amount. Where the carrying value exceeds this estimated value the asset is written down to the recoverable amount.

4.15 Insurance contracts

The Company issues contracts that transfer insurance risk or financial risk or both. Insurance contracts are those contracts that transfer significant insurance risk. Such contracts may also transfer financial risk. Significant insurance risk is defined as the probability of paying significantly more on the occurrence of an insured event than if the insured event did not occur.

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

Financial risk is the risk of a possible future change in one or more of a specified interest rate, security price, commodity price, foreign exchange rate, index of price or rates, a credit rating or credit index or other variable.

Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during this period, unless all rights and obligations are extinguished or expire. Investment contracts can however be reclassified as insurance contracts after inception if insurance risk becomes significant.

A number of insurance and investment contracts contain a DPF. This feature entitles the contract holder to receive, as a supplement to guaranteed benefits, additional benefits or bonuses:

- that are likely to be a significant portion of the total contractual benefits;
- whose amount or timing is contractually at the discretion of the Company, and;
- that are contractually based on:
 - the performance of a specified pool of contracts or a specified type of contract;
 - realized and/or unrealized investment returns on a specified pool of assets held by the Company; or
 - the profit or loss of the Company, fund or other entity that issues the contract.

The amount and timing of the distribution to individual contract holders is at the discretion of the Company, subject to the advice of the Appointed Actuary.

Insurance contracts and investment contracts with and without DPF are classified into three main categories, depending on the duration of risk and whether or not the terms and conditions are fixed.

Short-term insurance contracts

Short duration life insurance contracts protect the Company's customers from the financial consequences of events (such as death, sickness, or disability). Benefits paid on occurrence of the specified insurance event are either fixed or linked to the extent of the economic loss suffered by the policyholder. There are no maturity or surrender benefits.

Claims and loss adjustment expenses are charged to income as incurred based on the estimated liability for compensation owed to contract holders. They include direct and indirect claims settlement costs and arise from events that have occurred up to the reporting date even if they have not yet been reported to the Company. Liabilities for unpaid claims are estimated using the input of assessments for individual cases reported to the Company and statistical analyses for the claims IBNR.

Individual health insurance premiums are recognized as revenue when received. Group life and health insurance premiums are recognized as revenue over the related contract periods.

Long-term insurance and other contracts

Long-term insurance and other contracts insure events associated with human life (for example death, or survival) over a long duration. Premiums are recognized as revenue when they become payable by the contract holder. Premiums are shown before deduction of commission. Benefits are recorded as an expense when they are incurred.

A liability for contractual benefits that are expected to be incurred in the future is recorded when the premiums are recognized. The liability is based on assumptions as to mortality, persistency, maintenance expenses and investment income that are reviewed annually. A margin for adverse deviations is included in the assumptions.

Long-term insurance and other contracts are further classified into the following sub-categories:

- with fixed and guaranteed terms;
- with fixed and guaranteed terms and with DPF;
- without fixed and guaranteed terms; and
- without fixed and guaranteed terms and with DPF.

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

The contracts containing DPF participate in the profits of the Company. As the Company declares the amount to be paid, it is credited to the individual policyholders.

Long-term investment contracts with DPF

The fair value of these contracts is determined with reference to the fair value of the underlying financial assets and they are recorded at inception at their fair value.

4.16 Provision for future policy benefits

The provision for future policy benefits represents the amount required, in addition to future premiums and investment income, to provide for estimated future benefit payments, taxes (other than income taxes), commissions and policy administration expenses for all insurance and annuity policies in force with the Company. The Company's Appointed Actuary is responsible for determining the provision for future policy benefits.

The provision for future policy benefits is determined using accepted actuarial practices established by the Canadian Institute of Actuaries ("CIA"), which are accepted in The Bahamas. In accordance with these standards, the actuarial liabilities have been determined by the Appointed Actuary using the Canadian Asset Liability Method ("CALM") and the CIA Standards of Practice (Practice – Specific Standards For Insurers), Section 2300, Life and Health Insurance ("SOP").

CALM involves the projection of future interest rate scenarios in order to determine the amount of assets needed to provide for all future obligations. The method consists of four basic steps:

- 1. Determination of the period over which these projections are performed.
- 2. Projection of liability cash flows.
- Projection of asset cash flows.
- 4. Performance of interest rate scenario testing under a variety of plausible economic conditions.

The Company maintains specific assets to back the policy liabilities by lines of business. The projection of liability and asset cash flows recognizes these specific assets. The projection period is chosen so as to include all insured events in the valuation process.

The actuarial liabilities for very small blocks of business have been set up as 100% of their annual premiums. IBNR reserves for group life, accident and health are computed as a percentage of related premiums based on experience studies. These bases are in accordance with CALM and SOP.

4.17 Repurchase agreements

Repurchase agreements are transactions in which the Company sells a security and simultaneously agrees to repurchase it (or an asset that is substantially the same) at a fixed price on a future date. The Company continues to recognize the securities in their entirety in the consolidated statement of financial position because it retains substantially all of the risks and rewards of ownership. The consideration received is recognized as a financial asset and a financial liability is recognized for the obligation to pay the repurchase price. Because the Company sells the contractual rights to the cash flows of the securities, it does not have the ability to use the transferred assets during the term of the arrangement. Such transferred assets are included in "pledged financial assets at fair value through profit or loss" in Investment Securities and Other Financial Assets in Note 11.

4.18 Commission expense

Commission expenses comprise commissions earned by the Company's salespersons in respect of insurance and investment products sold. Commission expenses are recognized when payable.

4.19 Pension business

The pension business consists of third party pension plans with fund accumulations at rates of interest determined by the Company. There are no future interest or annuity rate guarantees. The liability established for future pension benefits for each of these plans is equal to the fund balance at the valuation date. Such third party pension liabilities are included in 'other liabilities,' see Note 20.

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

4.20 Policy dividends on deposit

Policy dividends on deposit comprise dividends declared on policies but not withdrawn from the Company, together with accrued interest.

4.21 Share capital

Shares are classified as equity when there is no obligation to transfer cash or other assets. Incremental costs directly attributable to the issue of equity instruments are shown in equity as a deduction from the proceeds.

Dividends on ordinary shares are recognized as a liability and deducted from equity when they are approved by the Company's Board of Directors. Dividends for the year that are approved after the reporting date are dealt with as an event after the reporting date.

4.22 Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when payment will be made. Revenue is measured at the fair value of the consideration received or receivable. Interest income for financial assets that are not classified as at FVPL is recognized using the effective interest method. Dividend income is recognized when the Company's right to receive payment is established – this is the ex-dividend date for equity securities. Commission income is earned on completion of the sale and is recognized at the effective date of writing the policy. Interest income on financing of premiums to customers is recognized over the financing period. The Company's policy for recognition of revenue from operating leases is described in Note 4.28. For the revenue recognition policies surrounding insurance contracts, see Note 4.15.

4.23 Reinsurance

In the normal course of business, the Company seeks to limit its exposure to loss on any single insured and to recover benefits paid, by ceding premiums to reinsurers under excess coverage contracts. Contracts entered into that meet the classification requirements of insurance contracts are classified as reinsurance contracts held. Amounts recoverable from reinsurers are estimated in a manner consistent with the policy liability associated with the reinsured and in accordance with the terms of each reinsurance contract.

Reinsurance liabilities are primarily premiums due for reinsurance contracts and are recognized as an expense when due.

An impairment review of recoverable amounts is performed at each reporting date or more frequently when an indication of impairment arises during the reporting year. Impairment occurs when objective evidence exists that the Company may not recover outstanding amounts under the terms of the contract and when the impact on the amounts that the Company will receive from the reinsurer can be measured reliably. The impairment loss is recorded in the consolidated statement of profit or loss.

Reinsurance assets or liabilities are derecognized when the contractual rights are extinguished or expire or when the contract is transferred to another party.

Ceded reinsurance arrangements do not relieve the Company from its obligations to policyholders.

The Company also assumes reinsurance risk in the normal course of business for non-life insurance contracts. Premiums and claims on assumed reinsurance are recognized as revenue or expenses in the same manner as they would be if the reinsurance were considered direct business, taking into account the product classification of the reinsured business. Reinsurance liabilities represent balances due to reinsurance companies. Amounts payable are estimated in manner consistent with the related reinsurance contract.

Premiums and claims are presented on a gross basis for both ceded and assumed reinsurance.

4.24 Defined contribution pension plans

The Company and its subsidiaries operate separate defined contribution pension plans. Contributions are made to the plans on a mandatory and voluntary basis. The Company has no further payment obligations once the contributions have been paid. The Company's portion of the contributions is charged to the consolidated statement of profit or loss as employee/salespersons' benefits expense in the year to which they relate.

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

4.25 Share-based payments

The Company and its subsidiaries operate separate Employee Share Ownership Plans ("ESOP"). Under these plans, eligible employees and salespersons can purchase common shares of the Parent on the open market through regular payroll deductions up to a maximum of 10% of eligible earnings. Employee and salespersons' contributions are matched by the respective contributing employer company at rates ranging between 20% to 100% of eligible earnings. The Company's matching contribution fully vests to the employee or salesperson after a period of 1-4 years, subject to the individual plan requirements. These share-based payments to employees and salespersons are measured at the fair value of the equity instruments at the grant date. The cost of matching employee and salespersons' contributions amounted to \$33,171 in 2018 (2017: \$26,712) and is included in employee/salespersons' benefits expense.

4.26 Taxation

The Company is subject to tax on taxable gross premium income at the flat rate of 3% (2017: 3%). Premium taxes are included in premium and other tax expense in the consolidated statement of profit or loss. The Company is also subject to Value Added Tax ("VAT") on taxable supplies at the standard rate of 7.5% from January 1 through June 30, 2018 and at the standard rate of 12.0% from July 1, 2018 through December 31, 2018 (2017: 7.5%). The Company is eligible, however, for input tax credits to reduce its VAT liability based on an apportionment formula based on its proportion of standard rated taxable supplies to non-taxable supplies. VAT incurred by the Company in excess of input tax credits received are apportioned to the Company's general and administrative expenses. There are no other corporate, income or capital gains taxes levied on the Company in The Bahamas or in any other jurisdictions in which the Company operates.

4.27 Segregated fund

With the acquisition of Imperial Life in 2005, certain contracts were acquired which allow unit holders to invest in a segregated fund managed by the Company for their benefit. Substantially all risks and rewards of ownership accrue to the unit holders and, consequently, the assets held in the segregated fund account are excluded from the assets in the Company's general funds. As of December 31, 2018, these assets amounted to \$47.4 million (2017: \$46.5 million). The Company has entered into a sub-investment management agreement with Colina Financial Advisors Ltd. to manage a significant portion of these assets.

4.28 Leases

Rental income due from lessees on operating leases is recognized on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized on a straight-line basis over the lease term

Where the Company is the lessee, leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases are charged to the consolidated statement of profit or loss on a straight-line basis over the period of the lease.

4.29 Other financial liabilities and insurance, trade and other payables

These items are recognized when due and measured on initial recognition at the fair value of the consideration paid. Subsequent to initial recognition, they are measured at amortized cost using the effective interest rate method.

Financial liabilities and insurance, trade and other payables are derecognized when the obligation under the liability is discharged, cancelled or expired. When the existing liability is replaced by another from the same lender on substantially different terms, or the terms of the existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the consolidated statement of profit or loss.

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

4.30 Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably.

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event; it is probable that the Company will be required to settle that obligation; and a reliable estimate can be made of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle that obligation at the reporting date and are discounted to present value.

5. Responsibilities of the Appointed Actuary and Independent Auditors

The Appointed Actuary is appointed by the Board of Directors and is responsible for carrying out an annual valuation of the Company's policy liabilities in accordance with accepted actuarial practice and reporting thereon to the Board of Directors. In performing the valuation, the Appointed Actuary makes assumptions as to the future rates of interest, asset default, mortality, claims experience, policy termination, inflation, reinsurance recoveries, expenses and other contingencies taking into consideration the circumstances of the Company and the policies in force. The Appointed Actuary's report outlines the scope of the valuation and the actuary's opinion.

The Independent Auditors have been appointed by the shareholders and are responsible for conducting an independent and objective audit of the consolidated financial statements in accordance with International Standards on Auditing. They report to the shareholders regarding the fairness of the presentation of the Company's consolidated financial statements in accordance with IFRS. In carrying out their audit, the Independent Auditors also make use of the work of the Appointed Actuary and the Appointed Actuary's report on the policy liabilities. The Independent Auditors' report outlines the scope of their audit and their opinion.

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

6. Subsidiaries

Subsidiaries of the Company as of December 31, 2018 are as follows:

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

7. Segment Information

For management purposes, the Company is organized into business units based on its products and services and has three reportable operating segments as follows:

- Life Division offers a wide range of whole life and term insurance, pension, annuity, and savings and investment products.
- Group and Health Division offers a wide range of individual medical and group life and health medical insurance.
- Other includes the Group's participation in International Reinsurance Managers, LLC ("IRM") reinsurance facilities and the operations of its other subsidiary and associated companies.

Segment performance is evaluated based on profit or loss, which in certain respects is measured differently from profit or loss in the consolidated financial statements.

No inter-segment transactions occurred in 2018 or 2017. If any transaction were to occur, transfer prices between operating segments are set on an arm's length basis in a manner similar to transactions with third parties. Segment income, expense and results would then include those transfers between business segments which would then be eliminated on consolidation.

The segment results for the period ended December 31 are as follows:

	2018						
	Life	Health	o Other	Total

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

8. Invested Assets

The following represent the Company's total invested assets which are comprised of the following:

	2018	2017
Term deposits	\$ 17,568,907	\$ 52,006,821
Investment securities and other financial assets	418,079,078	360,553,772
Mortgages and commercial loans	28,480,688	33,851,653
Policy loans	69,443,735	69,407,663
Investment properties	59,461,743	54,845,002
Equity-accounted investees	11,935,620	 11,200,685
Total invested assets	\$ 604,969,771	\$ 581,865,596

Invested assets comprise 84.5% of total assets at December 31, 2018 (2017: 83.1%).

9. Cash and Cash Equivalents

For the purposes of the consolidated statement of cash flows, cash and cash equivalents are comprised of the following:

	2018		2017
Term deposits	\$ 17,568,907	\$	52,006,821
Less: Deposits with original maturities of			
greater than 90 days	 (17,296,150)	_	(50,268,298)
Short-term deposits	272,757		1,738,523
Cash and demand balances	34,748,560		44,281,585
Less: Bank overdraft (See Note 20)	 (1,759,109)		(48,441)
Total cash and cash equivalents	\$ 33,262,208	\$	45,971,667

The carrying amounts disclosed above approximate fair value at the reporting date.

As of the reporting date, the weighted-average interest rate on short-term deposits is 0.0% (2017: 0.1%). These short-term deposits have an average maturity of 30 days (2017: 41 days). The weighted-average interest rate on deposits with original maturities greater than 90 days is 3.4% (2017: 1.6%).

Included in deposits with original maturities of greater than 90 days are restricted balances held in favour of regulatory bodies in the Turks & Caicos Islands and the Cayman Islands totaling \$2,254,449 (2017: \$2,244,236). No restricted amounts are included in cash and demand balances (2017: NIL).

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

10. Investment Securities and other Financial Assets

Investment securities and other financial assets comprise equity and debt securities classified into the following categories:

For Monage Property	2018	2017
Equity securities Fair value through profit or loss	\$ 10,477,641	\$ 12,762,030
Available-for-sale	11,995,372	13,876,752
Total equity securities	22,473,013	26,638,782
Non-pledged debt securities		
Fair value through profit or loss	48,816,030	58,863,982
Available-for-sale	270,152,217	210,307,648
Loans and receivables	45,000,000	35,000,000
Total debt securities (non-pledged)	363,968,247	304,171,630
Pledged debt securities (See Note 19)		
Fair value through profit or loss	31,637,818	29,743,360
Total debt securities (pledged)	31,637,818	29,743,360
Total pledged and non-pledged debt securities	395,606,065	333,914,990
Total investment securities and other financial assets	\$ 418,079,078	\$ 360,553,772

Included in financial assets at fair value through profit or loss are financial instruments in the Bahamas Investment Fund (See Note 33).

Included in investment securities and other financial assets are government debt securities which are mainly comprised of fixed rate and variable rate bonds tied to the Bahamian \$ Prime Rate issued by The Bahamas Government. These securities have interest rates ranging from 2.6% to 7.1% per annum (2017: from 4.3% to 7.1% per annum) and scheduled maturities between 2019 and 2065 (2017: between 2018 and 2065).

Included in debt securities classified as 'available-for-sale' is \$2,185,000 (2017: \$2,185,000) representing a restricted balance which is held in favour of the CILStatutory Trust (the "Trust"). The Trust was established in accordance with the Insurance Act, 2005 and Insurance (General) Regulations 2010 (as amended). The aforementioned legislation requires that a minimum of \$2,000,000 in assets be deposited in favour of the Insurance Commission of The Bahamas by registered insurers in respect of any entities which propose to carry on life and/or health insurance business.

The movements in the categories of investment securities are as follows:

	FVPL		Available- for-sale	а	Loans and receivables		Total
At December 31, 2016 Additions Disposals and maturities Net fair value gains/(losses)	\$ 105,194,665 47,117,918 (46,173,545) (4,769,666))	220,069,683 14,905,502 (13,488,189) 2,697,404	\$	35,000,000	\$	360,264,348 62,023,420 (59,661,734) (2,072,262)
At December 31, 2017 Additions Disposals and maturities Net fair value losses	101,369,372 22,486,144 (28,521,870) (4,402,157)		224,184,400 71,765,818 (12,315,614) (1,487,015)		35,000,000 10,000,000 -	_	360,553,772 104,251,962 (40,837,484) (5,889,172)
At December 31, 2018	\$ 90,931,489	\$	282,147,589	\$	45,000,000	\$	418,079,078

Realized and unrealized net fair value gains/(losses) are included in net investment income in the consolidated statement of income.

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

The following table shows an analysis of financial instruments recorded at fair value by level within the fair value hierarchy:

At December 31, 2018	Level 1 Level 2			Total Fair Value	
Financial assets designated at

The Group did not have any financial instruments classified as Level 3 as at December 31, 2017.

11. Receivables and Other Assets

Receivables and other assets are comprised of the following:

	2018	2017
Financial assets		
Premiums receivable	\$ 4,318,882	\$ 4,515,180
Less: Provision on premiums receivable	(1,957,457)	(2,128,113)
Reinsurance recoveries receivable	10,811,937	9,756,517
Net balances receivable on ASO plans	19,384,287	16,558,355
Agents' balances	981,364	1,158,788
Less: Provision on agents' balances	(972,194)	(1,163,778)
Accrued interest income	4,752,274	4,004,701
Receivables from related parties (See Note 34)	224,182	190,055
Participation in IRM reinsurance facilities	2,171,774	2,414,102
Non-financial assets		
Properties assumed under mortgage defaults	1,785,400	1,785,400
Land held for development	4,533,403	4,720,253
Prepayments and other assets	8,698,845	6,733,038
Total receivables and other assets	\$ 54,732,697	\$ 48,544,498

The carrying amounts disclosed above approximate fair value at the reporting date.

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

Administrative Services Only (ASO) receivables

Included in receivables and other assets are net amounts due from / (due to) groups to whom the Company provides administrative services only ("ASO").

Participation in IRM reinsurance facilities

The Company participates in reinsurance facilities managed by International Reinsurance Managers, LLC ("IRM"), an underwriting management company domiciled in the United States of America which provides group health reinsurance services to small and medium sized insurance companies in the Caribbean and Latin America. The Company's participation in these facilities varies from 10% to 50% for differing underwriting years and its interest is included above. The underlying assets of the reinsurance facilities are principally comprised of US Treasury money market instruments.

12. Policy Loans

Policy loans are comprised of:

	2018	2017
Policy loans	\$ 65,649,724	\$ 65,592,229
Accrued interest on policy loans	3,825,616	3,829,700
Subtotal	69,475,340	69,421,929
Less: Provisions	(31,605)	(14,266)
Policy loans, net	\$ 69,443,735	\$ 69,407,663

Policy loans are secured by the cash surrender values of the policies on which the loans are made with the exception of \$31,605 (2017: \$14,266) in policy overloans. Policy overloans represent policy loans in excess of the cash surrender values of the policies on which the loans are made. These overloans are not secured by cash surrender values. However, the related policies remain in force. The policy overloans have been fully provided for at December 31, 2018. Interest is accrued on a monthly basis and the loans are settled on termination of the policy, if not repaid while the policy remains in force. The approximate effective interest rate on policy loans is 11.4% (2017: 11.7%).

13. Mortgages and Commercial Loans

Mortgages and commercial loans are comprised of the following:

	201	<mark>8</mark> 2017
Mortgages and commercial loans Accrued interest	\$ 34,716,405 10,724,035	
Subtotal Less: Provisions	45,440,440 (16,959,752	-, - ,
Mortgages and commercial loans, net	\$ 28,480,688	\$ 33,851,653

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

Mortgages and commercial loans are classified into the following categories:

	2018	2017
Residential mortgages	\$ 18,916,852	\$ 22,685,625
Commercial mortgages	13,111,824	13,798,813
Commercial paper	2,687,729	2,683,035
Subtotal	34,716,405	39,167,473
Accrued interest	10,724,035	9,995,304
Total	\$ 45,440,440	\$ 49,162,777

The totals above represent the Company's gross exposure on mortgages and commercial loans. It is the Group's policy not to lend more than 75% of collateralized values pledged reducing the Company's overall net exposure.

Included in residential mortgages at December 31, 2018 are loans to employees and salespersons amounting to \$2,879,334 (2017: \$4,155,455).

Provisions on mortgages and commercial loans are as follows:

	2018	2017
Residential mortgages	\$ 3,382,297	\$ 2,561,856
Commercial mortgages	4,705,652	4,701,605
Accrued interest	 8,871,803	 8,047,663
Total provisions on mortgages and commercial loans	\$ 16,959,752	\$ 15,311,124

The movement in loan loss provisions is as follows:

	2018	2017
Balance, beginning of year	\$ 15,311,124	\$ 13,018,005
Increase in provisions	2,207,978	4,888,988
Provisions written back to income	(559,350)	(2,595,869)
Balance, end of year	\$ 16,959,752	\$ 15,311,124

As of the year-end reporting date, the approximate weighted average interest rates on mortgages and commercial loans are as follows:

	2018	2017
Residential mortgages	7.57%	7.52%
Commercial mortgages	9.15%	9.13%
Commercial paper	7.90%	7.90%

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

14. Investment Properties

The Company's investment properties consist of land holdings, residential rental properties, and commercial office rental properties and are carried at fair value. All investment properties have been classified as Level 3 in the fair value measurement hierarchy and there were no transfers from or to Level 3 during the period. Movements in investment properties classified by category are as follows:

			Commercial	
	Land	Residential	Office	Total
At December 31, 2016 Net loss from fair value adjustments	\$ 4,015,000 (875,000)	\$ 630,000	\$ 51,075,002 -	\$ 55,720,002 (875,000)
At December 31, 2017 Additions Transfers from property & equipment (Note 14) Net gain from fair value adjustments	\$ 3,140,000	\$ 630,000 - - -	\$ 51,075,002 495,743 3,229,196 891,802	\$ 54,845,002 495,743 3,229,196 891,802
At December 31, 2018	\$ 3,140,000	\$ 630,000	\$ 55,691,743	\$ 59,461,743

Net gains/(losses) from fair value adjustments are included in net investment income on the consolidated statement of profit or loss (See Note 27).

During the period, certain of the individual properties were valued by independent appraisers from Coldwell Banker Lightbourn Realty. All appraisers used are accredited independent appraisers with experience in the location and category of the investment property valued. The investment properties valued by the independent appraisers were evaluated using a weighted average of the Income Approach (IA) and Replacement Cost (RC).

In accordance with the Company's policy for the valuation of investment property holdings in intervening periods, the fair values of all properties at December 31, 2018 were based on valuations performed by management using the Discounted Cash Flow Method (DCF) and the Sales Comparison Method (SC). (2017: DCF and SC).

Significant unobservable inputs used in the valuations in 2018 were as follows:

Property Classification	Valuation technique	Significant unobservable inputs	Range (weighted average)
Land and land lots	sc	Sales price / acre	\$10,000 - \$320,000 (\$9,953)
	DCF	Estimated rental rate / sq.ft. / p.a. Discount rate	\$3 10.5%
		Rent growth p.a. Expense inflation p.a. Capitalization rate for terminal value Vacancy rate	3% 3% 9.25% 0%
Residential	SC	Sales price / sq.ft.	\$330 (\$330)
Commercial office	DCF	Estimated rental rate / sq.ft. / p.a. Discount rate	\$9 - \$78 9.25%-9.5%
		Rent growth p.a. Expense inflation p.a. Capitalization rate for terminal value	1.0% - 2.0% 3.0% 8.0% - 9.0%

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

	Vacancy rate	5% - 32.0%
SC	Sales price / sq. ft.	\$12 (\$12)
IA	Capitalization rate Estimated rental rate / sq.ft./ p.a.	9.0% \$9 -\$29

Significant unobservable inputs used in the valuations in 2017 were as follows:

Property Classification	Valuation technique	Significant unobservable inputs	Range (weighted average)
Land and land lots	SC	Sales price / acre	\$10,000 - \$320,000 (\$9,953)
	DCF	Estimated rental rate / sq.ft. / p.a. Discount rate	\$3 10.5%
		Rent growth p.a. Expense inflation p.a. Capitalization rate for terminal value Vacancy rate	3% 3% 9.25% 0%
Residential	sc	Sales price / sq.ft.	\$330 (\$330)
Commercial office	DCF	Estimated rental rate / sq.ft. / p.a. Discount rate Rent growth p.a. Expense inflation p.a. Capitalization rate for terminal value Vacancy rate	\$9 - \$75 8.5%-10.5% 2.0% - 3.0% 0% - 3.0% 8.0% - 9.25% 0% - 55%
	sc	Sales price / sq. ft.	\$12 (\$12)

Under the IA method, the projected net annual income net of estimated building expenses is determined and is divided by the capitalization rate. The capitalization rate is the expected rate of return used on similar investments.

The RC method bases the cost of replacing the subject property with a structure providing similar utility. The cost estimate may not be necessarily based on similar materials if considered appropriate by the appraiser based on current construction standards.

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

Under the DCF method, fair value is estimated using assumptions regarding the benefits and liabilities of ownership over the asset's life including an exit or terminal value. This method involves the projection of a series of cash flows on a real property interest. A market-derived discount rate is applied to establish the present value of the income streams associated with the property. The exit yield is normally separately determined and differs from the discount rate.

The duration of the cash flows and the specific timing of the inflows and outflows are determined by events such as lease renewals, and related re-letting, redevelopment, or refurbishment. The appropriate duration is typically driven by market behavior that is a characteristic of the class of property. Periodic cash flows are typically estimated as gross rental income less vacancy, non-recoverable expenses, maintenance and other operating and management expenses. The series of periodic net operating income, along with an estimate of the terminal value anticipated at the end of the projection period, is then discounted.

Under the SC method, fair value is determined by a comparison of recent property sales similar to the subject property. The prices for these properties provide the basis for estimating the value of the subject by comparison. Appropriate adjustments are made for the differences in the properties as they compare to the subject. The adjusted process yields various indicators of value which are analyzed and correlated to provide a value estimate for the subject property.

Significant increases (decreases) in estimated rental values and rent growth per annum in isolation would result in a significantly higher (lower) fair value of the property. Significant increase (decrease) in long-term vacancy rates and discount rates in isolation would result in a significantly lower (higher) fair value. Increases/(decreases) in the capitalization rate would result in a significantly lower (higher) fair value.

Generally, a change in the assumption made for the estimated rental value is accompanied by a directionally similar change in the rent growth per annum and discount rate and an opposite change in the long term vacancy rate.

The Company has no restrictions on the realisability of its investment properties and no contractual obligations to either purchase, construct or develop investment property for repair, maintenance and enhancement.

Investment properties, with carrying values totaling approximately \$13.5 million (2017: \$13.2 million), have been mortgaged in support of loans advanced to subsidiary companies by the Company. The referenced loans have been eliminated on consolidation. Income from investment properties, which amounted to \$4,947,720 (2017: \$4,802,067), is included in rental income in net investment income. Direct expenses related to generating rental income from investment properties, amounting to \$1,539,630 (2017: \$1,826,596), are included in general and administrative expenses.

15. Equity-accounted investees

Equity-accounted investees are comprised of:

	2018	2017
Walk-In Holdings Limited	\$ 3,808,047	\$ 3,653,381
SBL Ltd.	 8,127,573	 7,547,304
Total	\$ 11,935,620	\$ 11,200,685

Gains and losses from the Company's equity-accounted investees are comprised of the following:

	2018	2017
Share of profit of equity-accounted investees		
Walk-In Holdings Limited	\$ 154,666	\$ 328,777
SBL Ltd.	 580,270	868,863
Share of profit of equity-accounted investees	\$ 734,936	\$ 1,197,640

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

Walk-In Holdings Limited

In November 2007, the Company, through its wholly-owned subsidiary, PRO Health Holdings Ltd., acquired a 30% interest in Walk-In Holdings Limited ("WIHL"), a privately-held company incorporated in The Bahamas at a cost of \$3,402,631. WIHL owns and operates medical clinics in The Bahamas.

The investment in WIHL is comprised of the following:

	2018	2017
Total assets Total liabilities	\$ 10,235,867 (542,287)	\$ 10,045,727 (851,069)
Net assets of WIHL	\$ 9,693,580	\$ 9,194,658
Company's share of WIHL's balance sheet Goodwill Total investment in WIHL	\$ 3,075,346 732,701 3,808,047	\$ 2,920,680 732,701 3,653,381

Management estimates that the carrying value of the investment in WIHL approximates its fair value at the reporting date.

The Group's share of WIHL's net income is as follows:

	12 Months Ended Dec. 31, 2018	12 Months Ended Dec. 31, 2017
Total revenue	\$ 7,902,917	\$ 7,501,299
Total net income for the period	\$ 498,923	\$ 1,060,569
Share of WIHL's net income	\$ 154,666	\$ 328,777

SBL Ltd.

In July 2009, the Company and its Parent, purchased 12% and 7% of SBL Ltd. ("SBL") at a cost of \$5 million and \$3 million respectively. In considering the classification of its 12% equity holding in SBL, the Company has classified its investment in SBL as an equity-accounted investee as two of the ten Board members of SBL are also Directors of the Company. In May 2009, SBL acquired the issued and outstanding shares of Ansbacher (Bahamas) Limited ("ABL") and in July 2009, merged ABL subsequently with Sentinel Bank & Trust Limited ("SBT") with the surviving entity retaining the name Ansbacher (Bahamas) Limited. ABL's principal activities comprise private and specialist banking, wealth protection and management, and fiduciary services.

During 2013, the Company and its Parent made additional capital contributions of \$213,382 and \$124,473 respectively in SBL Ltd. The funds were used by SBL's subsidiary, ABL to partially fund the acquisition of Finter Bank and Trust (Bahamas) Limited. The Company and its Parent's percentage ownership in SBL Ltd. after the capital contribution remained at 12% and 7% respectively.

The investment in SBL is comprised of the following:

	2018		2017
Total assets Total liabilities Net assets of SBL	\$ 456,877,906 (385,570,372) 71,307,534	\$	528,771,965 (462,276,464) 66,495,501
Company's share of SBL's balance sheet Intangible assets Total investment in SBL	\$ 7,135,916 991,657 8,127,573	\$ <u>\$</u>	6,245,677 1,301,627 7,547,304

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

Management estimates that the carrying value of the investment in SBL approximates its fair value at the reporting date.

The Company's share of SBL's net income is as follows:

. ,	12 Months Ended	12 Months Ended
	Dec. 31, 2018	Dec. 31, 2017
Total revenue	\$ 25,665,796	\$ 31,861,523
Total net income for the period	\$ 4,835,580	\$ 7,240,522
Share of SBL's net income	\$ 580,270	\$ 868,863

The following table shows an analysis of goodwill and other intangible assets included in equity-accounted investees for the years ending December 31, 2018 and 2017:

	Other Intangible Assets						
	 Goodwill		Assets		Total		
Balance as of December 31, 2016	\$ 732,701	\$	143,115	\$	875,816		
Acquired during the year	-		1,271,968		1,271,968		
Amortization	 		(113,456)		(113,456)		
Balance as of December 31, 2017	732,701		1,301,627		2,034,328		
Acquired during the year	-		1,200		1,200		
Amortization	 		(311,170)		(311,170)		
Balance as of December 31, 2018	\$ 732,701	\$	991,657	\$	1,724,358		

The gross carrying value and accumulated amortization by major category of other intangible assets as of December 31, 2018, is shown below.

	Other Intangible Assets					
	G	Gross Carrying Accumulated				
		Value		Amortization		Total
Customer relationships	\$	2,002,667	\$	(1,038,214)	\$	964,453

Software		364,938		(337,734)		27,204
Total Other Intangible Assets	\$	2,511,125	\$	(1,519,468)	\$	991,657

The useful life of intangible assets with finite lives ranges from 2 to 10 years, with a weighted average amortization period of 9 years. Expected amortization of the intangible assets is shown below:

	asset	er intangible is included in y-accounted
		Investees
2019	\$	292,139
2020		277,358
2021		268,510
2022 and thereafter		153,650
	\$	991,657

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

16. Property and Equipment

		Land, land provements and buildings	im	Leasehold provements		Furniture, fixtures and equipment		Motor vehicles		Total
Cost / revalued amounts: At December 31, 2017 Additions Disposals Transfers to Investment Property (Note 14) At December 31, 2018	\$	24,379,162 78,178 - (4,294,142) 20,163,198	\$	1,398,029 - (680) - 1,397,349	\$	1,635,241 452,676 (48,217) - 2,039,700	\$	46,156 - - - - 46,156	\$	27,458,588 530,854 (48,897) (4.294,142) 23,646,403
At December 31, 2017 Disposals Depreciation charge Transfers to Investment Property (Note 14) At December 31, 2018	\$	7,946,885 - 649,285 (1,064,946) 7,531,224	\$	858,787 (680) 126,320 - 984,427	\$	1,223,679 (35,549) 239,964 	\$	38,794 - 2,520 - 41,314	\$	10,068,145 (36,229) 1,018,089 (1,064,946) 9,985,059
Net book value: At December 31, 2018 At December 31, 2017	<u>\$</u>	12,631,974 16,432,277	\$ \$	412,922 539,242	\$ \$	611,606 411,562	<u>\$</u>	4,842 7,362	\$ \$	13,661,344 17,390,443

The opening balances have been adjusted for fully depreciated assets.

The revalued amounts of land, land improvements and buildings is comprised of the following:

		2018	2017
Land and land improvements	\$ 5,	<mark>188,179</mark> \$	6,035,523
Buildings	14,9	975,019 <u> </u>	18,343,639
Total book value	\$ 20,	163,198 \$	24,379,162

Properties are stated at their revalued amounts, as assessed by qualified independent property appraisers or management valuation in intervening periods. The revalued amount is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction, after proper marketing wherein the parties had acted knowledgeably, prudently and without compulsion, assuming that the buyer is granted vacant possession of all parts of the property required by the business and disregarding potential alternative uses.

Increases in the carrying amount arising on revaluation of land and buildings are credited to the revaluation reserve in equity.

If land, land improvements and buildings were stated on a historical cost basis, the carrying amount would be approximately \$9.4 million (2017: \$11.9 million).

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

17. Goodwill

	2018	2017
Cost Accumulated impairment charges	\$ 10,473,068 (2,675,455)	\$ 10,473,068 (2,675,455)

Balance, beginning of year Impairment charge	\$ 7,797,613	\$ 8,004,568 (206,955)
Balance, end of year	\$ 7,797,613	\$ 7,797,613

18. Provision for Future Policy Benefits

The provision for future policy benefits is calculated using expected future policy lapse rates, mortality, morbidity, investment yield and policy maintenance expense assumptions and any other relevant contingency.

The provisions for adverse deviation recognize uncertainty in establishing these best estimates and allow for possible deterioration in experience. As the best estimate assumption is realized, the provisions for adverse deviations will be released in future income to the extent that they are no longer required to cover adverse experience.

The assumptions used in determining the provision for future policy benefits are reviewed regularly, compared to emerging experience and updated when appropriate. The assumptions that are most sensitive to change are investment yields, expenses, policy lapse rates, and mortality and morbidity.

Margins for Adverse Deviation Assumptions

The basic assumptions made in establishing provisions for future policy benefits are best estimates for a range of possible outcomes. To recognize the uncertainty in establishing these best estimates, to allow for possible deterioration in experience and to provide greater comfort that the provisions are adequate to pay future benefits, the Appointed Actuary is required to include a margin in each assumption.

The impact of these margins is to increase provisions and decrease the income that would be recognized on inception of the policy. The Canadian Institute of Actuaries prescribes a range of allowable margins. The Company uses assumptions which take into account the risk profiles of the business. The Closed Participating Fund ("Closed Par Fund"), discussed below, has the lowest margins, as the risk is passed back to the policyholders by dividend distributions.

Investment yields

The computation of provisions takes into account projected net investment income on assets supporting policy liabilities and income expected to be earned or forgone on reinvestment or financing of mismatched cash flows. Uncertainties exist with respect to projections of interest rates and the magnitude of losses from asset defaults. The Company accounts for such uncertainties by incorporating provisions for losses into projections of investment income. A margin for adverse deviation is calculated by interest rate scenario testing under the CALM methodology. The margin in the most adverse scenario can be interpreted as deducting 35 basis points from the current (Prime) rates immediately and assuming future interest rates remain at that level in the long term. If future interest rates were to differ by 100 basis points from that assumed in the valuation, without changing the policyholder dividend scale, the liability would increase by \$65.0 million or decrease by \$49.6 million.

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

Expenses

The administration expense assumption is based on an expense study conducted by the Company. The expenses are allocated by line of business using allocation factors developed by the Company. Such expense studies are conducted annually, and are subject to changes in the Company's cost structure as well as the rate of inflation. Best estimate expenses are assumed to increase with inflation range of 1.73% to 2.5% throughout the years. Expenses are increased by a range of 0% to 6.25%, where the Closed Par Fund has no margin. If future expenses are to differ by 10% from that assumed, the liability would increase by \$6.4 million or decrease by \$6.4 million.

Policy lapse rates

Policyholders may allow their policies to lapse by choosing not to continue to pay premiums. The Company bases its estimate of future lapse rates on previous experience for a block of policies. A margin for adverse deviation is added by increasing or decreasing lapse rates, whichever is adverse, by a range of 5% to 20%. If future margins on lapse rates are to differ by 10% from that assumed, the liability would increase by \$9.1 million or decrease by \$8.5 million.

Mortality and Morbidity

Assumptions for life business are based on Company and industry experience. A margin is added for adverse deviation in the range of 4.0 to 11.25 per 1000 divided by the expectation of life for mortality, and between 15% and 20% for morbidity. The Closed Par Fund has the lowest margin added. If future mortality and morbidity are to differ by 10% from that assumed, the liability would increase by \$3.5 million or decrease by \$3.2 million.

Medical claims costs

The principal assumption underlying the estimate of the medical claims reserve is the Company's past claims development experience and loss ratios. If the average claim costs were to increase by 10%, gross liabilities would increase by \$1.1 million, with the net liabilities increasing by \$1.0 million. If the average claim costs were to decrease by 10%, gross liabilities would decrease by \$1.1 million, with the net liabilities decreasing by \$1.1 million.

Analysis of provision for future policy benefits

The following is a summary of the provision for future policy benefits by product line:

	2018		2017
Life insurance	\$ 395,143,587	\$	379,776,906
Annuities	18,172,403		19,016,273
Accident and health	15,300,568		15,311,724
Colina Investment Plan (See Note 33)	 6,345,023	_	7,562,665
Total provision for future policy benefits	\$ 434,961,581	\$	421,667,568

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

The following is a summary of the provision for future policy benefits by contract category:

	2018	<mark>3</mark> 2017
Short-term insurance contracts	\$ 16,616,029	\$ 15,656,092
Long-term insurance and other contracts		
-with fixed and guaranteed terms	173,590,746	160,418,396
-with fixed and guaranteed terms and with DPF	204,869,587	202,929,242
-without fixed and guaranteed terms	18,777,763	19,494,806
-without fixed and guaranteed terms and with DPF	14,762,433	15,606,367
Long-term investment contracts with DPF	6,345,023	7,562,665
Total provision for future policy benefits	\$ 434,961,581	\$ 421,667,568

Analysis of change in provision for future policy benefits

	2018	2017
Balance, beginning of year	\$ 421,667,568	\$ 404,115,806
Changes in discretionary participation features	-	3,177,522
Normal changes in policy liabilities	7,133,682	13,414,106
Changes in assumptions and refinement of estimates	 6,160,331	 960,134
Balance, end of year	\$ 434,961,581	\$ 421,667,568

Closed Participating Fund

Included in the provision for future policy benefits as of December 31, 2018 are actuarial reserves totaling \$34.0 million (2017: \$33.5 million) relating to the Company's commitment to maintain and operate a Closed Participating Fund ("Closed Par Fund") covering the individual participating business (both life and annuity) of the Canada Life portfolio of business acquired on January 1, 2004. The objective of this Closed Par Fund is to finance the participating policyholders' reasonable expectations that the Company will: (i) pay the benefits guaranteed by each participating policy according to its terms; (ii) pay dividends according to the current dividend scale provided that current experience continues; and (iii) make an equitable adjustment to the dividend scale in future years to reflect any deviations from the current experience, in accordance with the insurer's dividend policy as well as applicable actuarial standards. Future profits that may emerge within the Closed Par Fund are for the sole benefit of the participating policyholders.

The Appointed Actuary's valuation of the Closed Par Fund as of December 31, 2018 shows that it had the following asset mix:

	2018	2017
Government securities	60.9%	56.3%
Policyloans	21.5%	22.1%
Equity securities	9.1%	9.2%
Mortgage loans	3.6%	5.1%
Cash and equivalents	0.9%	1.4%
Preference shares	0.6%	2.3%
Corporate bonds	3.4%	3.6%
Total	100.0%	100.0%

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

19. Repurchase Agreement

On December 7, 2015, the Company entered into a structured repurchase transaction with Deutsche Bank AG (DB), acting through its London Branch. On the initial exchange, DB funded the Company with an amount totaling US\$35 million at an annual fixed rate of 4.85% in exchange for delivery by the Company to DB of assets with face amounts totaling US\$47.5 million (the Pledged Bonds). The Pledged Bonds by the Company in respect of this transaction are bonds held by the Company through its interests in its subsidiary CFAL Global Bond Fund Ltd. (CGBF). The Company owns 100% of the issued shares in Class C of the CGBF and by agreement dated December 7, 2015, has been granted all rights and obligations over all assets and liabilities in Class C of the CGBF.

The repurchase agreement requires the funded amount by DB to the Company of US\$35 million to be repaid in 5 equal principal repayment instalments of US\$7 million. The Company met its scheduled repayments for the fiscal years ended December 2016 through 2018, and is scheduled to continue the scheduled repayments annually until December 10, 2020.

If the value of the Pledged Bonds falls by more than a minimum transfer amount of US\$250,000, the Company will be required to post the shortfall with DB in cash or cash equivalents within 1 business day. The minimum transfer amount was increased to US\$500,000 by an amendment dated May 24, 2016.

The table below shows the amount of collateral given in respect of the repurchase agreement:

	2018			2017		
Payables under sale and repurchase agreements	\$	14,000,000	\$	21,000,000		
Carrying amount of collateral provided in respect of above	\$	31,637,818	\$	29,743,360		

Collateral provided includes securities transferred under the repurchase agreement. The Company continues to recognize these securities in the statement of financial position and presents them within pledged financial assets at fair value through profit or loss.

The repurchase transaction is scheduled to terminate on December 10, 2020.

20. Other Liabilities

	2018	2017
Third party pension liabilities	\$ 27,413,434	\$ 26,483,905
Benefits payable to policyholders	14,551,392	14,106,912
Accrued expenses and other liabilities	27,712,324	25,913,602
Bank overdraft (See Note 9)	1,759,109	48,441
Reinsurance payables	4,921,577	1,876,435
Total other liabilities	\$ 76,357,836	\$ 68,429,295

The carrying amounts disclosed above approximate fair value at the consolidated balance sheet date.

21. Due to/from Parent

The balance Due from Parent of \$259,594 (2017: Due from Parent \$10,558) relates to intercompany balances between the Company and its Parent. The balance due from parent is interest free and due on demand.

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

22. Share Capital

	2018		2017
Authorized:			
1,000,000 Ordinary shares of	\$ 1,000,000	\$	1,000,000
B\$1.00 each (2017: 1,000,000)			
20,000 Ordinary shares of	\$ 200	\$	200
B\$0.01 each (2017: 20,000)			
Issued and fully paid:			
1,000,000 Ordinary shares of B\$1.00 each (2017: 1,000,000)	\$ 1,000,000	\$	1,000,000
20,000 Ordinary shares of B\$0.01 each (2017: 20,000)	\$ 200	\$	200
Share Premium	 1,999,800	_	1,999,800
	\$ 3,000,000	\$	3,000,000

In August 2010, the Board of Directors by resolution, authorized an additional 20,000 Ordinary Shares with a par value of \$0.01 to be offered at a share premium of \$99.99 each.

The Company then immediately offered to its Parent these additional 20,000 Ordinary Shares by converting \$2,000,000 of its share premium into paid up share capital of \$2,000,000 in the Company, resulting in the additional issued shares with a value of \$200 and the accompanying share premium of \$1,999,800.

23. Revaluation Reserve

The revaluation reserve is comprised of the net gain/(loss) on remeasurement of available-for-sale securities to fair value and revaluation adjustments related to land and buildings. Also included in the revaluation reserve are unrealized gains related to the purchase of additional equity in a subsidiary company subsequent to the date control was first established.

	 Available-for- Sale	Subsidiary Acquisitions		Land and Building	Total
Balance, as of December 31, 2016	\$ 5,606,821	\$ 2,291,925	\$	5,255,236	\$ 13,153,982

Balance as of December 31, 2017	8,229,621	2,291,925		5,255,236	15,776,782
Net fair value losses during the year	(1,503,731)	-		-	(1,503,731)
Transfers to net income	90,696	<u> </u>			 90,696
Balance as of December 31, 2018	\$ 6,816,586	\$ 2,291,925	\$	5,255,236	\$ 14,363,747

24. Contingent Liabilities and Commitments

The Company has the following contingent liabilities and commitments as of the year-end reporting date:

Legal proceedings and regulations

The Company operates in the insurance and financial services industry and is subject to legal proceedings in the normal course of business. While it is not practicable to forecast or determine the final results of all pending or threatened legal proceedings, management does not believe that such proceedings (including litigations) will have a material effect on its results and financial position.

The Company is also subject to insurance solvency regulations in all the jurisdictions in which it operates and has complied with all regulations. There are no contingencies associated with the Company's compliance or lack of compliance with such regulations.

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

Contingent liabilities

The Company may have contingent liabilities in respect of bank and other guarantees and other matters arising in the ordinary course of business. It is not anticipated that any material loss will arise from the contingent liabilities. Other than as disclosed in Note 11, as at December 31, 2018, the Company did not provide any guarantees to third parties in the ordinary course of business. (2017: NIL).

The Company, is from time to time, in connection with its normal operations, named as a defendant in actions for damages and costs allegedly sustained by the plaintiffs. The Board of Directors is of the opinion, based upon the advice of counsel, that the final outcome of such actions will not have a material adverse effect on the financial position of the Company.

Commitments

Lending: The Company had no commitments to extend credit for mortgages and commercial loans at December 31, 2018 (2017: NIL).

Purchase of property and equipment: The Company had no commitments for the purchase of capital equipment or services at December 31, 2018 (2017: NIL).

Leases: The Company leases office and other space for use in its day-to-day business activities pursuant to the terms of non-cancelable operating leases. The expenditures related to these lease arrangements are not considered to be material. The future aggregate minimum lease payments under operating leases as of December 31, 2018 are as follows:

	At December 31, 2018
No later than 1 year Later than 1 year and no later than 5 years	\$ 280,794 451,372
Later than 5 years	33,384
Total	\$ 765,550

25. Future Minimum Lease Payments Receivable

The Company derives rental income from certain of its investment properties under non-cancellable rental agreements. The future minimum lease payments due to be received under these agreements as of December 31, 2018 are as follows:

	2018
No later than 1 year Later than 1 year and no later than 5 years Later than 5 years	\$ 2,269,537 3,929,219 1,608,791
Total	\$ 7,807,547

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

26. Net Premium Revenue

Net premium revenue is comprised of the following:

	2018	2017
Life and health insurance premiums Less: Reinsurance premiums	\$ 122,093,147 (15,447,548)	
Subtotal Premiums from IRM reinsurance facilities (See Note 11)	106,645,599 14,830,431	108,297,675 9,660,285
Net premium revenue	\$ 121,476,030	<u>\$ 117,957,960</u>
Net premium revenues are classified in the following categories:

Premiums ceded to reinsurers	(15,447,548)	(13,432,046)
Net premium revenue	\$ 121,476,030	\$ 117,957,960

27. Net Investment Income

Net investment income is classified as follows:

	2018	2017
Term deposits	\$ 704,632	\$ 501,875
Investment securities		
Interest income	13,650,979	10,953,793
Dividend income	1,761,848	2,208,336
Net fair value (losses)/ gains included in the revaluation		
reserve (See Note 23)	(1,503,731)	· ·
Less: Investment management fees (See Note 34)	(2,153,899)	(1,835,292)
Net investment return on managed assets	12,459,829	14,485,679
Mortgages and commercial loans	996,434	(601,769)
Policy loans	7,457,111	7,685,098
Rental income	4,875,721	4,802,067
Net fair value gains/(losses) on investment properties (See Note 14)	891,802	(875,000)
Fair value losses on property assumed under mortgage default	-	(10,000)
Other fees and income/(expense)	44,490	(73,348)
Total return on invested assets	26,725,387	25,412,727
Less: Fair value losses/(gains) in the revaluation reserve	1,503,731	(2,656,967)
Total net investment income recognized in income	\$ 28,229,118	\$ 22,755,760

Included in net investment income are impairment charges from investment securities totaling \$4,151,862 (2017: \$\$4,343,192).

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

28. Net Policyholders' Benefits

Net policyholders' benefits are comprised of the following:

	2018	2017
Life and health policyholder benefits Less: Reinsurance recoveries	\$ 93,932,508 (13,279,741)	\$ 86,723,425 (14,658,421)
Subtotal Benefits paid on IRM reinsurance	80,652,767	72,065,004
facilities (See Note 11)	12,544,755	7,892,216
Total net policyholders' benefits	\$ 93,197,522	\$ 79,957,220

Included in life and health policyholder benefits is \$847,565 related to interest on policy dividends on deposit (2017: \$864,117).

Policyholders' benefits for the year by contract classification were as follows:

	201	<mark>8</mark> 2017
Short-term insurance contracts	\$ 57,445,980	\$ 50,419,616

Total general and administrative expenses	\$ 27,201,783	\$ 28,033,829

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

30. Finance Costs and Interest

Finance costs and interest are comprised of:

	2018	2017
Interest on third party pension liabilities	\$ 1,143,371	\$ 1,116,362
Interest on liabilities due to ASO groups	726,660	457,277
Other interest costs	223,735	275,276
Total finance costs and interest	\$ 2,093,766	\$ 1,848,915
Total illiance costs and interest	\$ 2,093,700	φ 1,646,915

2010

2017

31. Dividends Per Share

Dividends to the Parent are recognized as a liability in the period in which they are declared by the Board of Directors. Dividends paid by the Company to its ordinary shareholder in 2018 totalled \$7,568,400 or \$7.42 per ordinary share. (2017: \$9,353,400 or \$9.17 per ordinary share).

32. Pension Plan

The Company and its subsidiaries operate various defined contribution plans for eligible administrative employees and salespersons which are administered by a related company. Under the respective plans, eligible staff and salespersons contribute between 5% to 7.5% of pensionable earnings with the subsidiary Companies contributing between 5% to 7.5%. The subsidiary Company's matching contributions vest with the employee/salesperson on various scales but fully vest after five to ten years. Pension expense for the year was \$608,220 and is included in salaries and employee/salespersons' benefits expense (2017: \$614,292).

33. Unit Linked Funds and Investment Plans

Certain policy contracts allow the policyholder to invest in units in a notional fund called the Bahamas Investment Fund (the "BIF"). The value of the units is linked to the performance of the underlying assets of the BIF. These assets may be varied by the Company from time to time and neither the policyholder nor any other person who may be entitled to benefit has any legal or beneficial interest in the BIF or the units or any underlying assets, which are solely the property of the Company.

Certain policy contracts, obtained through the acquisition of the former Colina in 2002, allow the policyholder to acquire units in a notional investment fund known as the Colina Investment Plan (the "CIP"). The value of the units is based on the performance of the underlying assets of the CIP. These assets may be varied from time to time.

Depending on the issue date of their policy, the Company may have guaranteed investors in the CIP a minimum rate of return of either 4% or 4.5% per annum, payable at maturity. The liabilities in relation to these guarantees are included in the provision for future policy benefits.

Issuance of new CIP policies was discontinued in January 2001.

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

The underlying assets of the BIF and CIP that are included in their respective categories in the reporting at December 31, 2018 are as follows:

	Bahamas Investment				Colina Investment

Liabilities						
Other liabilities	\$ -	\$ 81,240	\$ 719,191	\$ -	\$ 800,431	\$ 722,756

Loans advanced to related parties included in mortgages and commercial loans carry interest rates of 5.5% p.a. (2017: 5.5% p.a.).

35. Risk Management

Governance Framework

The primary objective of the Company's Corporate Governance framework is to protect the Company's shareholders from events that hinder the sustainable achievement of financial performance objectives, including failing to exploit opportunities. Key management recognizes the critical importance of having efficient and effective risk management systems in place. The Company has a clear organizational structure with documented delegated authorities and responsibilities from the Board of Directors to executive management committees and senior managers.

Regulatory Framework

Regulators are primarily interested in protecting the rights of the policyholders and have established guidelines and regulations by which the Company is required to comply to ensure that the Company is satisfactorily managing affairs for their benefit. The operations of the Company are subject also to regulatory requirements in the foreign jurisdictions in which it operates. The Company's regulators are interested in ensuring that the Company maintains an appropriate solvency position to meet unforeseen liabilities arising from changes in the economic environment. Such regulations not only prescribe approval and monitoring of activities, but also impose certain restrictive provisions to minimize the risk of default and insolvency on the part of insurance companies to meet unforeseen liabilities as they arise.

Insurance risk

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount and timing of the resulting claim.

For a portfolio of insurance contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the Company faces under its insurance contracts is that the actual claims and benefit payments exceed the carrying amount of the insurance liabilities. This could occur because the frequency or severity of claims and benefits are greater than estimated. Insurance events are random and the actual number and

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

amount of claims and benefits will vary from year to year from the estimate established using statistical techniques.

Experience shows that the larger the portfolio of similar insurance contracts, the smaller the relative variability about the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected across the board by a change in any subset of the portfolio. The Company has developed its insurance underwriting strategy to diversify the type of insurance risks accepted and within each of these categories to achieve a sufficiently large population of risks to reduce the variability of the expected outcome.

Factors that increase insurance risk include lack of risk diversification in terms of type and amount of risk, geographical location and type of industry covered.

Frequency and severity of claims

For contracts where death is the insured risk, the most significant factors that could increase the overall frequency of claims are epidemics or wide spread changes in lifestyle such as eating, smoking and exercise habits, resulting in earlier or more claims than expected. For contracts where survival is the insured risk, the most significant factor is continued improvement in medical science and social conditions that would increase longevity.

At present, these risks do not vary significantly in relation to the location of the risk insured by the Company. However, undue concentration by amounts could have an impact on the severity of benefit payments on a portfolio basis.

The table below indicates the concentration of insured benefits across four bands of insured benefits per coverage insured rounded to the nearest thousand.

	2018 (in \$000s)	2017 (in \$000s)
\$0 to \$49,999	\$ 407,866	\$ 427,364
\$50,000 to \$99,999	859,823	888,275
\$100,000 to \$149,999	2,090,139	2,133,836
\$150,000 and over	3,153,832	3,115,832
Total	\$ 6,511,660	\$ 6,565,307

The Company manages risks through its underwriting strategy and reinsurance arrangements. The underwriting strategy is intended to ensure that the risks underwritten are well diversified in terms of type of risk and the level of insured benefits. Medical selection is also included in the Company's underwriting procedures with premiums varied to reflect the health condition and family medical history of the applicants. The Company limits the amount of loss on any one policy by reinsuring certain levels of risk in various areas of exposure with other insurers.

Generally, the Company has retention limits on insurance policies as follows:

	2018	2017
Individual life	\$ 50,000	\$ 50,000
Individual accidental death and dismemberment	\$ 50,000	\$ 50,000
Individual personal accident	\$ 50,000	\$ 50,000
Group accidental death and dismemberment	\$ 50,000	\$ 50,000
Individual and Group Medical	\$ 250,000	\$ 250,000

Reinsurance ceded does not discharge the Company's liability as the primary insurer and failure of reinsurers to honour their obligations could result in losses to the Company.

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

Financial risk

The Company is exposed to financial risk through its financial assets, financial liabilities (investment contracts and borrowings), reinsurance assets and insurance liabilities. In particular, the key financial risk is that the proceeds from its financial assets are not sufficient to fund the obligations arising from its insurance and investment contracts. The most important components of this financial risk are interest rate risk, credit risk and liquidity risk.

These risks arise from open positions in interest rate and equity products, all of which are exposed to general and specific market movements. The risk that the Company primarily faces due to the nature of its investments and liabilities is interest rate risk.

The Company manages these positions within an asset liability management ("ALM") framework that has been developed to maximize long-term investment returns in excess of its obligations under insurance and investment contracts. The principal technique of the Company's ALM is to match cash flows from assets to the liability cash flows arising from insurance and investment contracts by reference to the type of benefits payable to contract holders. For each distinct category of liabilities, a separate portfolio of assets is maintained.

The Company's ALM is integrated with the management of the financial risks associated with the Company's other financial assets and liabilities not directly associated with insurance and investment liabilities.

Interest rate risk

The Company is vulnerable to periods of declining interest rates given that most of its investments in government bonds have floating interest rates tied to the Bahamian \$ Prime rate. The Company manages this risk by attempting to retain a level of assets to liabilities with similar principal values, effective interest rates and maturity dates.

The Company monitors interest rate risk by calculating the duration of the investment portfolio and the liabilities issued. The duration is an indicator of the sensitivity of the assets and liabilities to changes in current interest rates. The duration of the liabilities is determined by projecting expected cash flows from the contracts using best estimates of mortality, morbidity and terminations. No future discretionary supplemental benefits are assumed to accrue. The duration of the assets is calculated in a consistent manner. Any gap between the duration of the assets and the duration of the liabilities is minimized by means of buying and selling securities of different durations. The Company's sensitivity to interest rate risk is included in Note 18.

Credit risk

Credit risk arises from the failure of a counterparty to perform according to the terms of the contract. From this perspective, the Company's credit risk exposure is primarily concentrated in its deposits placed with other financial institutions, loans to policyholders and other clients, and amounts due from reinsurers and insurance contract holders.

The Company's deposits are primarily placed with well-known high quality financial institutions. Loans to policyholders are generally collateralized by cash surrender values of the respective policies. Mortgage loans are adequately secured by properly registered legal charges on real property. With respect to the Company's unsecured commercial paper loans and other material unsecured receivables, management is satisfied that the debtors concerned are both financially able and willing to meet their obligations to the Company except in those instances where impairment provisions have been made.

Reinsurance is used to manage insurance risk. This does not, however, discharge the Company's liability as primary insurer. If a reinsurer fails to pay a claim for any reason, the Company remains liable for the payment to the policyholder. The creditworthiness of reinsurers is considered on an annual basis by reviewing their financial strength prior to finalization of any contract. The Appointed Actuary advises management with respect to the Company's reinsurance placement policy and assists with assessing the creditworthiness of all reinsurers by reviewing credit grades provided by rating agencies and other publicly available financial information. The Company's main reinsurer is Munich Reinsurance Company Canada Branch (Life).

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

The table below provides information regarding the credit risk exposure of the Company by classifying assets according to the Company's internal assessments of the credit ratings of counterparties. The table also includes an aging analysis of financial assets, providing information regarding the Company's exposures on amounts current, and past due:

Management's internal credit rating assessment allows for Government Securities and listed equity securities to be included in the 'Investment Grade' classification.

Liquidity risk

The Company is exposed to daily calls on its available cash resources, mainly from claims arising from insurance contracts. Liquidity risk is the risk that cash may not be available to pay obligations when due at a reasonable cost. Management sets limits on the minimum proportion of maturing funds available to meet such calls and on the minimum level of borrowing facilities that should be in place to cover maturities, claims and surrenders at unexpected levels of demand.

The table below summarizes the maturity profile of the financial liabilities of the Company based on remaining contractual obligations (undiscounted cash flow basis):

For the Year Ended December 31, 2018 with corresponding figures for the Year Ended December 31, 2017 (Expressed in Bahamian dollars)

Price risk

The Company's listed and unlisted equity securities are susceptible to market price risk arising from uncertainties about future values of the investment securities. The Company has a relatively small investment in local equities which are exposed to market price risk arising from uncertainties about the future values of the investment. A sensitivity analysis has therefore not been presented. Securities reports on the equity portfolio are submitted to the Company's senior management on a regular basis. The Company's Board of Directors and/or respective Board Committees review and approve equity investment decisions meeting thresholds established in each respective subsidiary's Investment guidelines.

Settlement Risk

The Company's trading activities may give rise to settlement risk. Settlement risk is the risk of loss due to the failure of counterparty to honor its obligations to deliver cash, securities, or other assets as contractually agreed. For those transactions, the Company mitigates settlement risk by the simultaneous commencement of the payment and the delivery parts of the transaction.

Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes or systems. Internal processes include activities relating to accounting, reporting, operations, compliance and personnel management. Such risk manifests itself in various breakdowns, errors and business interruptions and can potentially result in financial losses and other damage to the Company.

The Company regularly assesses new systems which will better enable the Company to monitor and control its exposure to operational risk in order to keep operational risk at appropriate levels.

Capital Management

The Company manages its capital requirements by assessing shortfalls between reported and required capital levels on a regular basis. Adjustments to current capital levels are made in light of changes in economic conditions and risk characteristics of the Company's activities. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid or return of capital to the shareholders.

The Company fully complied with all externally imposed capital requirements during the reported financial period and no changes were made to the Company's capital base, objectives, policies and processes from the prior year.

Externally imposed capital requirements for the Company are set and regulated by the Insurance Commission of The Bahamas. These requirements are put in place to ensure sufficient solvency margins. At December 31, 2018, the Company exceeded both the statutory margin requirement and the minimum ratio requirement of qualifying to admissible assets. Further objectives are set by management and the Board to maintain a strong credit rating and healthy capital ratios in order to support its business objectives and maximize shareholders' value. For the purposes of assessing its capital position, the Company uses the capital on its consolidated statement of financial position excluding goodwill and with limitations placed on all but the strongest forms of capital.

In addition to the solvency margins as required by statute, the Company measures its solvency ratio using Canadian reserving methodologies and solvency standards as measured by the Minimum Continuing Capital and Surplus Requirement ("MCCSR"). The Canadian Insurance regulator has set a MCCSR supervisory target of 150%. At December 31, 2018, the Company's MCCSR exceeded the target.

36. Other Subsequent Events

Dividends declared for the Ordinary Shareholder

The Board of Directors, by resolution dated March 20, 2019, authorized the payment of an ordinary dividend of \$4.24 per issued and outstanding ordinary share of the Company be paid to its Parent on April 22, 2019.
